Plant Botanical Name:

Artemisia mauiensis

USBG Plant Location:

Conservatory

Conservatory Room Location:

Hawaii

Plant Threat Level:

Threatened

Maui mugwort (known in Hawaii as `Ahinahina or hinahina), is a Hawaiian endemic perennial subshrub grows only along cliff faces and in subalpine shrub
aromatic and resembles a garden favorite, Artemisia 'Powis Castle'. Like many Hawaiian endemic plant species, it faces peril due to both land developmen
animal species. Hawaiians historically planted this Artemisia with native Acacia to discourage insects from infesting the seed pods.
