

Search the United States Botanic Garden Living Collections Database

Enter latin name or common name

Search Tips:

Enter one or more words from the scientific or common name (excluding authorities or cultivar indicators eg. cv).

Entries can be either upper case or lower case.

Either * or] can be used as wildcard characters at the end of any search values. For example to search for all values starting with *Mag*, enter

mag* or mag]

Multiple search criteria should be separated by a comma.

For example to lookup only *Cliviaminata*, enter:

Clivia minata

To look up both *Cliviaminata* and *Camellia japonica*, enter:

Clivia minata, camellia japonica.

These data are extracted from the on-line Living Collections database, *BG-BASE*, and made available on the Web using the HTMLEXPOR
the Royal Botanic Garden Edinburgh.
