

Plant Botanical Name:

Iris reticulata

Plant Sub Species or Variety:

'Harmony'

USBG Plant Location:

National Garden

Sunlight:

Full sun to part sun

Plant Soil Type:

Well drained garden soil

Plant Moisture Requirements:

Low

Iris reticulata 'Harmony' is a beautiful dark purple, spring-blooming iris. It is fragrant, deer resistant and drought tolerant. With no serious disease or pest issues, it is a wonderful addition when planted in mass along walks, in the front of a border or adjacent to a water feature.
