

Plant Botanical Name:

Helleborus x hybridus

USBG Plant Location:

Bartholdi Park

Sunlight:

Shade to part shade

Plant Soil Type:

Organically rich, well drained

Plant Moisture Requirements:

Medium

A wonderful addition to any shade garden, this plant heralds the coming of spring with nodding blossoms that begin to show during the later frosts of winter. It tolerates the humidity of the South and the cold of the North, but is best in the Mid-Atlantic region. Cut the blooms back after flowering and any leaves that are suffering from winter damage. Foliage growth.
