

Media Resources

Education is core to the mission of the U.S. Botanic Garden and we welcome media inquiries that help demonstrate the aesthetic, cultural, economic, therapeutic, and educational importance of plants.

For questions, to schedule an interview with staff, request photos for editorial use, or connect about a possible news/educational filming about the U.S. Botanic Garden, contact Devin Dotson, below. The Garden is not available for photo-/videoshoots of topics not related to the Garden.

USBG in the News

Quick Facts

In 1820, the U.S. Congress granted land for a national botanic garden, and it is the oldest continuously operating botanic garden in the country. It is part of the federal government, and has been administered through the Architect of the Capitol since 1934.

The U.S. Botanic Garden is a living plant museum and accredited by the American Association of Museums and Botanical Garden Conservation International. The public components of the U.S. Botanic Garden:

- The Conservatory houses the following displays and exhibits: Garden Court, The Tropics, Plant Adaptations, Garden Primeval, Hawaii, World Display, Orchids, Mediterranean, Rare and Endangered Species, Southern Exposure (seasonally), Children's Garden (seasonally), and temporary exhibits in the Galleries.
- The National Garden features a Regional Garden of Mid-Atlantic native plants, a Rose Garden devoted to the national flower, a Butterfly Garden, a Children's Garden, and an Amphitheater.
- Bartholdi Park houses historic Bartholdi Fountain with gardens is a showcase of beautiful, sustainable, and accessible landscape design. It was designed according to the principles of the Sustainable SITES Initiative. The accessible garden design features native plants, water-conserving rain gardens, wildlife habitat, wheelchair accessibility, and Frederic Auguste Bartholdi's historic *Fountain of Light and Water*.

The U.S. Botanic Garden maintains more than 12,000 accessions, comprising about 65,000 plants for exhibition, study, conservation and exchange with other institutions. Noteworthy collections include economic plants, medicinal plants, orchids, carnivorous plants, cacti and succulents, Mid-Atlantic native plants and ferns. Significant specimens from the U.S. Exploring Expedition (1838-1842).

The U.S. Botanic Garden also serves as a rescue center for plants confiscated at U.S. borders in cooperation with CITES, the Convention on International Trade in Endangered Species of Wild Fauna and Flora.
